WORK EXPERIENCE

- JPMorgan Chase & Co.**, Software Engineer II Dec 2025 – Present
- Engineered the Apple Card Monthly Installments integration with Chase using Java and Spring Boot to support SafePay's processing of millions of transactions monthly.
 - Architected critical backend logic for the Funding Flow while actively contributing to API design and database persistence strategies to ensure high scalability.
 - Implemented a resilient store-and-forward mechanism for failed transactions to minimize data loss and enhance fault tolerance.
 - Provisioned and managed scalable cloud infrastructure utilizing AWS and Terraform to streamline deployment and system reliability.
- M&T Bank**, Software Engineer I Jul 2024 – Dec 2025
- Directed a 1 TB migration from clustered file systems to Blob Storage to achieve 25% cost savings.
 - Built an automated account cleanup tool eliminating 1,000+ stale records to reduce operational overhead by 30%.
 - Actively contributed to 10+ deployments and monitoring to cut incident response times by 15%.
- FusionSpan**, Salesforce Software Developer Jan 2024 – Jul 2024
- Resolved 10+ integration issues between Fonteva and Sitecore to restore seamless CRM workflows.
 - Enhanced pricing rules and automated record-triggered flows to lower manual corrections by 20%.
- M&T Bank**, Software Engineer Jun 2023 – Jan 2024
- Developed a Spring Boot microservice handling 5,000+ daily alerts to improve incident communication.
 - Designed an Angular-based UI for the alerting system to improve employee adoption by 40%.
 - Built an Export Service utilized by 200+ employees weekly to streamline reporting.

CORE COMPETENCIES

- Backend Development (Java, Spring Boot, Python, Node.js, Ruby)
- Cloud & Infrastructure (AWS S3, ECS Fargate, RDS, Cognito, Bedrock, CloudFront, SES, Docker, Terraform)
- Full-Stack Development (React, Next.js, Angular, JavaScript, HTML, CSS)
- CI/CD & DevOps (Docker, GitHub Actions, Jenkins, Vercel, Amplify)
- Database & Systems (SQL, UNIX/Linux, Oracle, PostgreSQL)
- Agile Development & Cross-Functional Collaboration

PROJECT EXPERIENCE

- AI-Powered Fitness & Nutrition Platform** (AWS, Spring Boot, React/Next.js)
- Architected a full-stack platform generating personalized workout and nutrition plans.
 - Built the backend with Spring Boot REST APIs, containerized via Docker, and deployed on ECS Fargate.
 - Integrated Amazon Bedrock for AI-driven generation and implemented authentication with AWS Cognito.
 - Deployed the frontend with React and Next.js using AWS Amplify to deliver a fully responsive UI.
- Bank-Wide Integration Testing Framework** (Java, Spring Boot)
- Designed a testing framework adopted across the entire bank to streamline workflow validation.
 - Enabled rapid integration testing for new workflows by embedding them into enterprise applications.
 - Delivered user-friendly generic code supporting a write-once-use-everywhere approach now deployed in 13+ applications.
- Tung Terrors – Black ops 3 Contest** (Top 20 Finalist) View
- Delivered a fully functional game map in two weeks to earn Top 20 status out of 56 entries.
 - Introduced innovative mechanics such as a time-bank system and risk-reward gameplay loops.
 - Designed five unique challenge trials and built a token economy for upgrades.

EDUCATION

- University of Maryland, College Park** Dec 2023
- B.S. in Computer Science Cumulative GPA: 3.90/4.00

TECHNICAL SKILLS

- Languages:** Java, Python, C, C++, Ruby, JavaScript, Node.js, SQL
- Frameworks:** Spring Boot, React, Next.js, Angular
- Cloud & Tools:** AWS (S3, ECS Fargate, Cognito, RDS, Bedrock, SES), Docker, GitHub Actions, Jenkins, Terraform
- Databases:** Oracle, PostgreSQL, MySQL
- Systems:** UNIX/Linux, Windows

CERTIFICATIONS

- AWS Certified Cloud Practitioner – Amazon Web Services (2025)
